EXPERIENCE

Full Stack Developer (Freelance Collaboration)

Web Landers · May 2024–Dec 2024

- Developed responsive frontend pages using React.js and Next.js frameworks.
- Built robust backend services using Python and JavaScript technologies.
- Integrated MySQL and Supabase databases for scalable data management.
- Led a team of four developers in collaborative project delivery.
- Achieved 15% faster delivery than baseline schedule for all projects.
- Served international and local business clients with diverse needs.
- Maintained 95% client satisfaction rate through effective coordination.
- Conducted comprehensive code reviews across all development projects.

EDUCATION

B.Tech in Computer Science

Bennett University · 2022–2026

Senior Secondary

GD Goenka International School · 2020–2022

High School

Vidya Global School (IGCSE) · 2011–2020

PUBLICATION

Brain Tumor Classification Using DeiT Vision Transformer

16th ICCNT IEEE Conference, IIT Indore · July 2025

PROJECTS

Money Mate

Next.js PWA using Gemini 2.5 Flash API to parse receipts and split expenses among participants.

<https://matemoney.vercel.app/>

NeuroVision

End-to-end full-stack application using Vision Transformer for real-time MRI tumor detection.

<https://github.com/sahabji0P/NeuroVision>

Suraksha-AI

Flask-based system using YOLOv11 + CBAM for high-accuracy object detection on live video.

<https://github.com/sahabji0P/spot-ai>

Khel Onn

Java/XML Android application with Firebase for event registration, live scoring, and notifications.

<https://github.com/sahabji0P/KhelOnn>

Recycle Bin

Next.js/MongoDB platform with real-time analytics and interactive dashboards for recycling commerce.

<https://github.com/sahabji0P/recycle-bin>
